

ABHA App

August 4-5, 2022

New Delhi (NCR)

Objectives

- 01 Explain the need for the ABHA App for Personal Health Records
- 02 Understand the key features and benefits of the ABHA App
- 03 Summarize use case scenarios for the ABHA App

01

Introduction

Introduction

The ABHA mobile application, or the ABHA App enables the users to connect to the Ayushman Bharat Digital Mission (ABDM) ecosystem. With this app you can perform the following functions:

**Create ABHA
Address**

**Link Health
Records**

**View Health
Records**

**Consent to
Share**

<https://play.google.com/store/apps/details?id=in.ndhm.phr>

02

Need for ABHA App

Need for ABHA App

Need for a **standardized app** that is used across the digital health space

Need for **accessing and exchanging of health records** between various care provider organizations

Need to **capture and represent longitudinal view** of the patient's clinical history across the entities

03

Key Features

Key Features

1. **Create** an ABHA address
2. **Access** health reports such as lab reports, prescription along with other records like CoWIN vaccination reports at your fingertips.
3. **Discover** health facility to link, view and manage health records by citizens
4. **Search** for registered health professionals/facilities
5. **Share** health records with doctor, health facility, and health program of your choice with your consent. Revoke consent when required.

04
